# INTRODUCTION

## 1.1. Purpose

This test plan outlines the testing approach and framework that will guide the testing activities for the E-CommerceHub system. It encompasses key aspects such as the Test Strategy, Execution Strategy, and Test Management processes. The document outlines the rules governing the testing process, including project timelines, objectives, assumptions, entry and exit criteria, creation of test cases, specific tasks, scheduling, and data strategy.

## 1.2. Project Overview

E-CommerceHub is a comprehensive e-commerce platform designed to provide users with a seamless and secure shopping experience. The system incorporates various modules, with a particular focus on user authentication, product search, catalogue viewing, shopping cart management, profile editing, user registration, order placement, and order viewing. The platform aims to offer users a feature-rich environment, ensuring the security and confidentiality of user information in accordance with established policies.
